NOTICE TO READERS. The search capability on the AMS Journals Online Web site (**http://ams.allenpress.com**) now allows for rapid, targeted identification of articles that match user-specified subject and author criteria. Because of this capability we are able to save considerable production time that would have otherwise been required to generate year-end subject indexes in print. Printed author indexes will continue to be provided in the final issue of the year for each journal. Readers are encouraged to browse AMS journals online to search titles and abstracts of articles referred to in the index below by visiting the AMS Web site (**http://www.ametsoc.org**).
